PROFESSIONAL SUMMARY:

Certified Data Analyst with 4+ years of Amazon experience in quality operations, KPI and SLA tracking, data accuracy and stakeholder coordination. Skilled in SQL, Python, Excel and Power BI, with projects in data cleaning, modelling, dashboards and business analysis. Experienced in monitoring performance, identifying trends and translating data into insights for business decisions and process improvement.

TECHNICAL SKILLS:

Programming & Querying: Python, SQL, PostgreSQL, JOINs, GROUP BY, Subqueries, CTEs, Aggregate & Window Functions
Analytics & BI: Power BI, Star-Schema Modelling, DAX, KPI Cards, Interactive Dashboards; Excel (PivotTables, XLOOKUP/VLOOKUP, SUMIFS, COUNTIFS, Charts, Conditional Formatting, Data Cleaning)
Libraries & Tools: Pandas, NumPy, Matplotlib, Seaborn, Joins, groupby() Aggregation
Analytical & Business Skills: Descriptive Statistics, KPI/SLA Tracking, Root-Cause Analysis, Data Validation, Stakeholder Communication, Workload Prioritization, Team Mentoring, Process Improvement

PROJECTS:

ShopNest Sales & Customer Insights Dashboard | Power BI, DAX

- Analysed sales, orders, delivery, payments, ratings and regional performance across 99K orders and $15.8M in revenue.
- Built an interactive dashboard using star-schema modelling, DAX, KPI cards and visualizations to answer 8 business questions.
- Identified Bed_Bath_Table delivery delays (811 orders), peak monthly volumes in March (1,638) and November (1,043), São Paulo's 33% sales contribution ($5.2M), and credit cards' 73.9% payment share.
- Recommended additional logistics capacity in peak months and regional growth beyond São Paulo to support delivery performance and sales expansion.

Project Cost & Employee Data Analysis | Python, Pandas, NumPy

- Analysed 3 CSV files with 24 rows: 5 employee, 5 seniority and 14 project records, including 2 missing project costs.
- Joined and cleaned datasets, imputed missing costs using a running average, split full names and removed redundant columns.
- Applied business rules across 10 analytical tasks, including designation updates and bonus calculations for completed projects.
- Calculated 5% bonuses for 7 completed projects; used groupby() to identify one employee accounting for 9.5M of 26.4M total project costs (36%).

Customer Retention & Cohort Analysis | PostgreSQL, SQL

- Analysed 805,531 purchase lines from 5,878 identifiable customers in the UCI Online Retail II dataset to investigate repeat purchases, retention and revenue.
- Used CTEs, window functions, conditional aggregation, date functions and views to answer 5 questions on repeat purchases, cohort retention, purchase timing and revenue.
- Found 71.3% repeat purchasing, a median 63 days to the second purchase day among returning customers, approximately 21% Month 1 retention, and repeat customers contributing 96.0% of gross revenue (GBP 16.74M of GBP 17.43M).
- Recommended testing re-engagement campaigns between days 30 and 90 and comparing cohort retention patterns to improve repeat purchasing.

PROFESSIONAL EXPERIENCE:

Digital Content Associate | Amazon **Jul 2022 - Present**

- Manage content quality operations for 1K+ ASINs monthly, ensuring compliance with global publishing standards.
- Monitor quality, average handling time (AHT) and SLA targets while prioritizing high-volume workloads and escalations.
- Conduct quality checks, resolve escalations with international stakeholders, allocate work across 10 team members and mentor new joiners.
- Maintained 99.80% quality accuracy and 100% SLA compliance across high-volume content operations.

Customer Service Associate | Amazon **Aug 2021 - Feb 2022**

- Handled product, service and order queries in a high-volume customer service environment.
- Resolved 50+ daily queries, maintaining accurate account records and confidentiality.
- Assessed customer needs, recommended products and followed procedures for timely, accurate resolution.
- Achieved 95% CSAT with an average handling time below 7 minutes.
