PROFESSIONAL SUMMARY

Certified Data Analyst with 4+ years of Amazon experience in quality operations, KPI and SLA tracking, data accuracy, and stakeholder coordination. Skilled in SQL, Python, Excel, and Power BI, with hands-on project experience in data cleaning, data modeling, dashboard development, and business analysis. Experienced in monitoring operational performance, identifying trends, and translating data into actionable insights to support business decisions and process improvement.

TECHNICAL SKILLS

- **Python & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, data cleaning, joins, groupby() aggregation
- **SQL:** JOINs, GROUP BY, subqueries, CTEs, aggregate and window functions
- **Power BI:** Star-schema data modeling, DAX, KPI cards, interactive dashboards
- **Excel:** PivotTables, XLOOKUP/VLOOKUP, SUMIFS, COUNTIFS, charts, conditional formatting, data cleaning
- **Analytics:** Descriptive statistics, KPI and SLA tracking, root-cause analysis, data validation
- **Professional Skills:** Stakeholder communication, workload prioritization, team mentoring, process improvement

PROJECTS

ShopNest Sales & Customer Insights Dashboard *(Power BI, DAX)*

- Analyzed sales, order, delivery, payment, customer rating, and regional performance data across 99K orders and $15.8M in revenue.
- Developed an interactive Power BI dashboard using star-schema data modeling, DAX measures, KPI cards, and visualizations to answer eight business questions.
- Identified delivery-delay concentrations in Bed_Bath_Table (811 orders) and peak monthly volumes in March (1,638 orders) and November (1,043 orders); found that São Paulo contributed 33% of sales ($5.2M), while credit cards accounted for 73.9% of payments.
- Recommended additional logistics capacity during peak months and regional growth strategies beyond São Paulo to support delivery performance and sales expansion.

Project Cost & Employee Data Analysis *(Python, Pandas, NumPy)*

- Analyzed three CSV files containing 24 rows in total: five employee records, five seniority records, and 14 project records, including two missing project costs.
- Cleaned and combined the datasets using joins, imputed missing project costs using a running average, split full names into first and last names, and removed redundant columns.
- Applied business rules across 10 analytical tasks, including designation updates and bonus calculations for completed projects.
- Calculated 5% bonuses for seven completed projects and used groupby() aggregation to identify that one employee accounted for 9.5M of the 26.4M total project cost (36%).

Customer Retention & Cohort Analysis *(Postgre SQL, SQL)*

- Analyzed 805,531 purchase lines from 5,878 identifiable customers using the UCI Online Retail II dataset to investigate repeat purchasing, customer retention, and revenue contribution.
- Developed SQL queries using CTEs, window functions, conditional aggregation, date functions, and views to evaluate five business questions covering repeat purchases, cohort retention, purchase timing, and revenue.
- Identified a 71.3% repeat purchase rate, a median of 63 days to the second purchase day among returning customers, and approximately 21% Month 1 retention; found that repeat customers contributed 96.0% of gross revenue (£16.74M of £17.43M).
- Recommended testing customer re-engagement campaigns between days 30 and 90 and evaluating retention patterns across cohorts to identify opportunities for improving repeat purchasing.

WORK EXPERIENCE

Amazon – Digital Content Associate **July 2022 – Present**

- Manage digital content quality operations for product listings involving 1K+ ASINs per month, ensuring compliance with global publishing standards.
- Monitor daily performance against quality, average handling time (AHT), and SLA targets while prioritizing high-volume workloads and escalations.
- Conduct quality checks, resolve escalations with international stakeholders, allocate work across a 10-member team, and mentor new joiners.

- Maintained 99.80% quality accuracy and 100% SLA compliance while managing high-volume content quality operations.

Amazon – Customer Service Associate **Aug 2021 – Feb 2022**

- Handled customer queries related to products, services, and orders in a high-volume customer service environment.
- Resolved 50+ customer queries daily while maintaining accurate account records and following confidentiality requirements.
- Assessed customer needs, recommended suitable products, and followed established procedures to support timely and accurate query resolution.
- Achieved 95% customer satisfaction (CSAT) while maintaining an average handling time (AHT) of under seven minutes.

EDUCATION

Certified Data Analyst – Skillovilla **2026**

B.Com in Information Technology – Nehru Arts and Science, Coimbatore **2016 – 2019**
